

Put your Primavera Software in the Cloud

The MLM Managed Services Solution

Put your Primavera Software in the Cloud with MLM Project Services

With all the buzz about Cloud Computing, business owners and managers are curious if Cloud Computing is the right solution to meet their demanding technological requirements.

Cloud Computing is described as:

Internet based computing, whereby shared resources, software and information are provided to computers and other electronic devices, on demand.

There are many distinct advantages to cloud computing, including the tremendous cost savings and improved quality of service. However, many organizations are cautious about releasing control of their technology and data to a third party provider.

MLM Project Services helps ease separation anxiety

The level of security and quality of data control offered by MLM Project Services often exceeds your current in-house security architecture and offers an affordable solution to providing increased protection for your data.

The key differentiators between being in the cloud with MLM Project Services and traditional on-premises deployments of your systems are:

- **Cost Savings** – There is no outlay of capital expenses, operating expenses are drastically reduced.
- **Scalability** – MLM allows companies to “scale up” and “scale down” as their needs dictate, at low, predictable, monthly cost.
- **24x7x365 Access** – Your hosted solutions are accessible anywhere an Internet connection is available and backed by our Service Level Agreement (99.95% Uptime Guaranty).
- **Fast Implementations** – Your applications are deployed and ready for use in a matter of days without the traditional deployment and configuration issues encountered in a self-deployed environment.
- **Sustainability** – All hosted systems are fully redundant, monitored, and maintained around the clock by expert, certified engineers and consultants, with hot spares on-site to minimize downtime

Companies need High Availability and Secure technical environments, so why self-host and self manage when MLM Project Services can do it faster, better, and for significantly less money?

MLM Project Services is an Authorized Oracle|Primavera Hosting Provider and affiliate company of DRMcNatty & Associates, in business for over 20-years and an Authorized Oracle|Primavera Gold Partner with offices in California and New York.
