

Integrated Project Management Solutions

Centrally Hosted by MLM Project Services

In today's competitive market having all your project information centrally hosted and collaboratively accessible to all project participants is crucial to successful planning, management, and project completion.

No longer is it feasible (or efficient) for individuals to have separate/multiple versions of data being exported and imported when one standard version of truth can be accessible to everyone at anytime via the Internet (based upon their security and access privileges).

At MLM Project Services, a division of DRMcNatty & Associates, our mission is:

*To help our clients achieve success
through the most efficient deployment and management
of the technical environment to support their information systems*
