

Why Trust Your Primavera Software Applications To MLM Project Services?

When it comes to hosting and managing your Primavera software applications, you definitely don't want any surprises. With MLM Project Services (MLM) you get reliable, scalable, and highly available systems with, no downtime, no hidden costs, and 24-hours a day support from a single and dependable source.

MLM can free up your internal IT resources and provide you with a competitive business advantage, enabling you to:

- Increase business agility and time to market
- Reduce upfront and ongoing capital investments
- Reduce maintenance and management costs
- Improve internal and external service levels
- Reduce the need to hire, train, retain, and manage a large IT staff
- Maintain advanced technology with worry-free support, maintenance, operations, upgrades, and disaster recovery
- Refocus IT resources on more revenue enhancing core business initiatives

Criteria for choosing a Primavera Hosting Provider

Outsourcing your Primavera software applications is a service that involves hardware and software, along with the expertise to support your technical environment. As such, you want to make sure that the company you select is reputable, reliable, responsive, flexible, and knowledgeable about your business. You also want to make sure the company is financially stable and that they have the technological infrastructure to deliver the services promised. Finally, always check customer references.

When evaluating a Primavera hosting provider, look for these traits:

- An understanding of your company's goals and objectives
- Quality customer service
- Great customer references and industry reputation
- Value-added complimentary products and services
- Favorable relationships with selected software vendors
- Authorized and certified support resources
- Application software knowledge
- Rapid problem solving capability
- A best practice hosting model in place

MLM possesses all of the above attributes and successfully works with companies year after year who recognize the importance of having a "High Availability" user experience, as well as, the value of maintaining a relationship with a reputable and Authorized Primavera hosting provider.
